Vaccinations Available for Respiratory Syncytial Virus Season

The purpose of this bulletin is to inform providers of the vaccinations available for Respiratory Syncytial Virus (RSV) season (traditionally, October–March). Two new RSV vaccines have been approved by the Centers for Disease Control and Prevention’s (CDC) Advisory Committee on Immunization Practices (ACIP) committee for adults 60 years of age or older, based on discussions between the patient and their health care provider: **Abrysvo** [Pfizer] and **Arexvy** [GSK]. ACIP-recommended vaccines are covered by DMAS in accordance with Item 304.EEEE in the 2022 Appropriations Act and Item 288.ZZZ of the 2024 Appropriations Act.

One RSV monoclonal antibody preventive therapy (not a traditional vaccine) has been approved by ACIP for administration to infants and toddlers: **Beyfortus** (nirsevimab) [AstraZeneca/Sanofi].

Indications

Abrysvo & Arexvy: [ACIP recommended](#) one-time for **adults 60 years of age or older** “based on discussions between the patient and their health provider”.

Abrysvo: [ACIP recommended](#) for **pregnant mothers** once between 32-36 weeks gestation.

Beyfortus (nirsevimab): [ACIP recommended](#) for the following:

- ALL infants **<8 months old** entering their *first* RSV season, AND
- HIGH RISK children **8-19 months** old entering their *second* RSV season

mResvia [Moderna]: [ACIP recommended](#) one-time for **adults 60 years of age or older**.

Coding/ Rates

PRODUCT	POPULATION	AGES	PRODUCT CODE(S)	PRODUCT TYPE	REIMBURSEMENT	ADMINISTRATIVE COMPENSATION

		<19Y	90678	Vaccine	Per VFC regs no compensation for cost of product.	
mResvia	Adults	60Y+	90683	Vaccine	See DMAS fee schedule	"When an immunization is the only service performed, an appropriate minimal office visit (e.g., CPT/HCPCS code 99211), may be listed in addition to the injection." (FFS Manual)
Beyfortus	Children	<19M	90380 90381	Monoclonal Antibody (mAb)	For mAb product, use administrative codes 96380 w/o counseling, 96381 w/counseling. No compensation for cost of product.	No additional coding required/permissible.

**Arexvy, Abrysvo and mResvia can also be obtained in pharmacy*

To avoid disruption to claims payment through FFS and the MCOs providers must periodically check the DMAS provider portal, also known as the Provider Services Solution (PRSS), to ensure that the provider's enrollment, contact information, and license information is up to date, for all of the provider's respective service locations. Under federal rules, MCOs and DMAS are prohibited from paying claims to network providers who are not enrolled in PRSS. Additional information is provided on the [MCO Provider Network Resources webpage](#) and includes links to resources, tutorials and contact information to reach Gainwell with any provider enrollment or revalidation related questions. Dental providers should continue to enroll directly through the DMAS Dental Benefits Administrator, DentaQuest.

Managed Care Programs

Cardinal Care Managed Care and Program of All-Inclusive Care for the Elderly (PACE). In order to be reimbursed for services provided to a managed care enrolled individual, providers must follow their respective contract with the managed care plan/PACE provider. The managed care plan may utilize different guidelines than those described for Medicaid fee-for-service individuals.
