Changes in Pharmacy Billing for Influenza Vaccine — Effective October 17, 2011

Last Updated: 03/09/2022

Changes in Pharmacy Billing for Influenza Vaccine – Effective October 17, 2011

The purpose of this memorandum is to inform providers that DMAS will begin reimbursing pharmacies through the Pharmacy Point of Sale (POS) claims processing system for influenza vaccine, effective October 17, 2011, for recipients that are age 19 years and older enrolled in the fee-for-service Medicaid Program. Please note that vaccinations including influenza vaccines for Medicaid recipients through age 18 years are covered by the Vaccines for Children program.

Coverage of Influenza Vaccine for Adults under the FFS Medicaid Program

Previous to this change, influenza vaccine claims could only be billed by pharmacies that used the Medicaid medical claims payment process. DMAS has made changes to the Medicaid Management Information System (MMIS) to allow all Medicaid enrolled pharmacies to submit claims for the influenza vaccine using the pharmacy POS claims processing system. Payment methodology for pharmacy products is defined in VAC 12VAC30-80-40 at <http://leg1.state.va.us/cgi-bin/legp504.exe?000+reg+12VAC30-80-40>. Influenza vaccine claims will be reimbursed using the lowest of the following: Estimated Acquisition Cost (EAC) which is currently Average Wholesale Price (AWP) minus 13.1%, the provider's usual and customary charge (U&C), the Federal Upper Limit (FUL) or Virginia's Maximum Allowable Cost (MAC). In addition the pharmacy will receive the standard dispensing fee of \$3.75.
